The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/568,308	Applicant(s) WEBER, JAMES L.	
	Examiner Korie H. Chan	Art Unit 3632	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claims 12 and 13 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 12 depend claim 14 which is nonexistent. Claim 13 also dependent on claim 12. Consequently claims 12 and 13 are not treated on its merits until dependency has been clarified.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Moradell et al (US patent no. 6,113,051). Moradell discloses a seat track assembly comprising: a lower track (11) having an outer distal wall (11), the outer distal wall having a plurality of locking windows (14) formed therein; an upper track (29) slidably coupled to the lower track for movement among a plurality of seating positions relative to the lower track, the upper track including a wall (21) and a distal wall (21) spaced apart from the wall for receiving the outer distal wall of the lower track therebetween during movement of the upper track relative to the lower track, the wall and the distal wall each having corresponding pluralities of first and second support apertures (25); a

Art Unit: 3632

locking mechanism (3) for selectively interlocking the upper and lower tracks, the locking mechanism having a plurality of pins (32) selectively movable in and out of a locked position, wherein the plurality of pins extends through the locking window of the lower track and is supported by the first and second support apertures of the upper track in a double shearing condition to prevent sliding adjustment of the upper track relative to the lower track; regarding claim 9, wherein the locking mechanism allows incremental adjustment of the upper track relative to the lower track among the plurality of seating positions, wherein the plurality of seating positions are equally spaced by a predetermined adjustment increment.

Claims 1-7 are allowed.

Claims 10 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art of record further demonstrate seat track assembly with pin locking assembly of interest.
